

North Chevy Chase News

Village of North Chevy Chase, P. O. Box 15887, Chevy Chase, MD 20815

WWW.NORTHCHEVYCHASE.ORG

Next Village Meeting will be on Tuesday, April 18, 2006, at 8:00 pm, in the Youth Lounge, NCC Christian Church.

AGENDA HIGHLIGHTS

- Permit to replace a fence at 3702 Kenilworth Drwy.
- Permit to construct a portico at 3704 Inverness Dr.
- Finalize the proposed budget for FY 2007
- Nominating Committee Report

PERMITS GRANTED

The following permits were granted at Village Council Meeting, March 21, 2006 for the following:

- Permit to construct an addition at 3601 Inverness Drive.

VILLAGE PERMITS

Village permits are required for additions or alterations to existing structures and new construction as well as for the replacement or erection of fences. Please refer to the Village regulations for details or contact the Village office at 301-654-7084. A copy of the Village regulations, and permit forms are available on the Village website at www.northchevyCHASE.org.

BUDGET FOR 2006-2007

The Village Council is in the process of finalizing the budget for Fiscal Year 2007. Please e-mail (nccvm@comcast.net) the Village Manager or talk with any of the Council Members if you have budget items to consider.

Village Manager & Editor

Bob Weesner

Village Council

Chairman: Anne Cantrel
Vice-Chairman: Cynthia Sexton
Treasurer: Nate Spiller
Secretary: Jim Grissom
Member: Shannon Dorman

Fire Board Representatives

Ed Asher, Demetrios Lambros

Design: www.zilart.com

TAX TIME REMINDER

For any Village residents who file their State tax return extra early, don't forget to include the Village as your "city" at the top right corner of the return.

NOMINATING COMMITTEE

The Village has appointed a Nominating Committee of Demetrios Lambros, Mana McNeill and Ann Cohen. Four seats on the Village Council and one seat on the Fire Board will expire this year. There will be two vacancies on the Council and one on the Fire Board. Any qualified Village voter interested in serving or recommending someone to serve on the Council or Fire Board may contact a member of the Committee.

VILLAGE ELECTIONS

Village residents who are eligible to vote in Montgomery County elections are automatically eligible to vote in Village elections. Voters who have registered with the County need not re-register to vote in the Village election. However, residents who have not registered will need to show proof of residence to vote. Absentee ballots are available by calling or writing the Village Office by April 21.

VILLAGE WEBSITE

Thanks to the efforts of John Appleby, the Village Website, www.northchevy Chase.org has been updated. The site now contains back issues of the Newsletter, minutes of Village meetings, treasurer's reports and will have the final version of the Fiscal 2007 Annual Budget. The link has been repaired so that Permit Applications are again available for downloading. We hope to have a satellite map of the Village on the site shortly.

MVA ON WHEELS

The MVA mobile office will be at the Village of Friendship Heights on the following dates during the first half of 2006:

April 24, May 22, June - no service

GUTTER CLEANING

Thomas Fagan	301.718.0851
--------------	--------------

If Village residents wish to be included on these lists, please call the Village office at 301.654.7084.

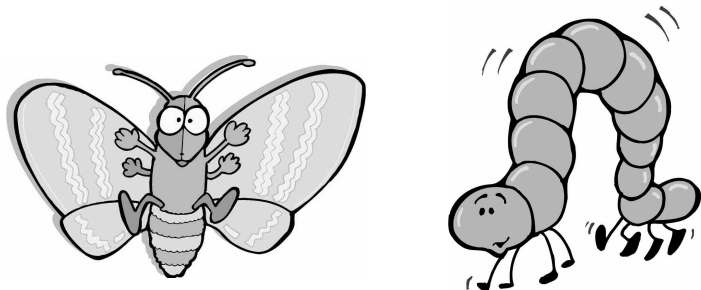

AN INSECT EMERGENCE SCHEDULE

Eastern Tent Caterpillar. Depending on weather conditions, the eggs hatch around the first week of April. This may even occur before the wild cherry buds have opened. After a few days, the caterpillars spin silk tents which they enlarge as they grow. Most feeding damage occurs in May. You can limit this by scouting for the tents in limb crotches of cherry or crabapple trees. Insert a wooden pole into the tent, rotate to form a sticky silken mass of unhappy caterpillars, transfer to a plastic bag, tie and discard. Fact sheet HG-21*

Hemlock Wooly Adelgid. Infested hemlocks show white waxy accretions at the base of needles, where females lay egg masses in early April. For control this time of year, wait until all the eggs have hatched in mid-June, and then spray the tiny crawlers thoroughly with a summer rate of horticultural oil, or insecticidal soap. The key to control is thorough spray coverage. An alternative control approach is to spray over-wintering adelgids with horticultural oil in early March before egg laying begins. Fact sheet HG-2*

Wood Ticks [Dog ticks] are usually out by early May. Unlike the tiny deer tick, wood ticks are easy to see, and should be carefully removed from you and your dog since they are potential sources of Rocky Mountain Spotted Fever. If you use Frontline on your dog, now is the time to apply it.

Gypsy Moth. In early May, the first instar small caterpillars will be eating in tree tops, making shot holes in the leaves. By the time they are full grown [4th or 5th instar] they migrate down during day and back up at night when they can defoliate their favorite tree. Fact sheet HG-44* describes sticky bands and burlap for trapping the nocturnal foragers and also has a website for the Maryland Department of Agriculture annual aerial spray program, which has minimized the impact of gypsy moths in our neighborhood.

Periodic Cicadas, in their famous 17 year cycle, will be with us from mid May to mid June. Cicada damage results not from feeding but from the egg-laying habits of females. Female cicadas insert a hardened appendage, called an ovipositor, into the bark of small twigs and gouge longitudinal slits. Eggs are laid in these slits, and twigs so damaged may eventually fall off the tree. The minimum diameter for twigs and branches that female cicadas use for egg-laying is 1/4". Shrubs or young trees with stem diameters or main scaffold branches with diameters between 1/4"-3/8" may experience significant damage. Plants at risk can be protected by covering with 3/8" mesh netting. I purchased a 28'x28' square for \$30 + \$8 postage from Roxbury Farm and Garden Center, 1-877-373-9124. Cicada fact sheet HG-43*. For a list of plants at high risk for damage, see: [www.agnr.umd.edu/users/nrsl/entm/Cicada Information Sheet%5B1%5D.pdf](http://www.agnr.umd.edu/users/nrsl/entm/Cicada%20Information%20Sheet%5B1%5D.pdf)

Bagworms. Eggs hatch in early June, and the newborn tiny caterpillars immediately spin a cocoon-like bag. Bagworms move about freely to feed, and they carry their bags with them. The bags gradually enlarge during the summer to house the growing caterpillar. Feeding damage continues until the caterpillars have completed their growth in late August. Conifers, especially arborvitae, cedar, juniper, and pine are the most frequently damaged host plants. If the host plant is small, you can control by pulling off the bags attached to plant stems in the autumn. Otherwise, spray with *Bacillus thuringiensis* between mid June and mid July when the caterpillars are at a vulnerable stage. Fact sheet HS-32*.

***To obtain fact sheets.** Download or order via the web: go to www.hgic.umd.edu, click on Publications, click on Online publications, and select from list. Or by mail, write to Home and Garden Information Center, 12006 Homewood Rd., Ellicott City, MD 21042. Telephone: 1-800-342-2507. Or pick them up in the Cooperative Extension Office in Derwood. If you have questions or comments, call Dr. Ed Leonard at 301-656-5639.
